STAT

I recently read [REDACTED] Intelligence
Assessment, "Improvements in Performance of Soviet
Antitank Guided-Missile Warheads," and found it
to be a fine piece of analysis. [REDACTED] not
only provided some forward-leaning conclusions
but presented them in a manner useful to expert
and layman alike. I would note particularly his
excellent tutorial on shape-charge theory.

[REDACTED] is to be commended for a job well
done.
